# I/ High-Profile Case

Lloyd's List  
Parasite 1714

This account of the carrier Clemenceau's return to France after being sold to India has been updated to reflect the latest information available. It is not definitive. For the latest news and analysis, visit [www.lloydslist.com](http://www.lloydslist.com). For more information on the ship's history, see the historical section of the website.

Tugs tow the Clemenceau into Brest, three months after France was forced to backtrack on plans to have it dismantled in India.

## Clemenceau back home at Brest after 18,000-mile trip

By Andrew Sparier in Paris

FRANCE'S ill-starred ex-aircraft carrier Clemenceau returned on Tuesday to its home port of Brest, where it was built more than 40 years ago.

The vessel, now known officially as Q 790 and under tow,

presented itself at the entrance to the port, as planned, shortly before 1000 hours local time. It will berth by 1600 hours after an 18,000 mile journey virtually to India and back.

Brought into port by the ITC

deepsea tug Noble Cape, it was taken under tow by French navy tugs from the port of Seynay in Brest harbour under tight security.

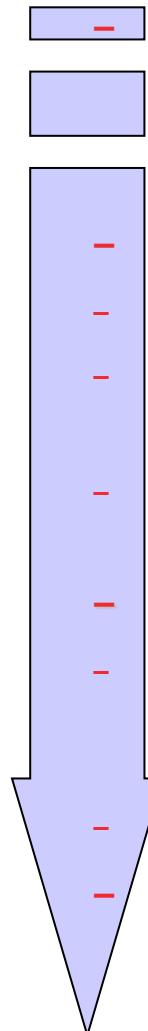

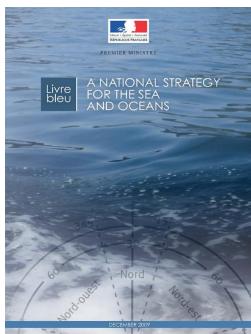

Military personnel and technicians were dropped aboard the

vessel by helicopter, while navy commandos accompanied it in a boat. A small boat had earlier attempted to approach it.

The contract for the demolition of the vessel is expected to be placed at the end of this year.

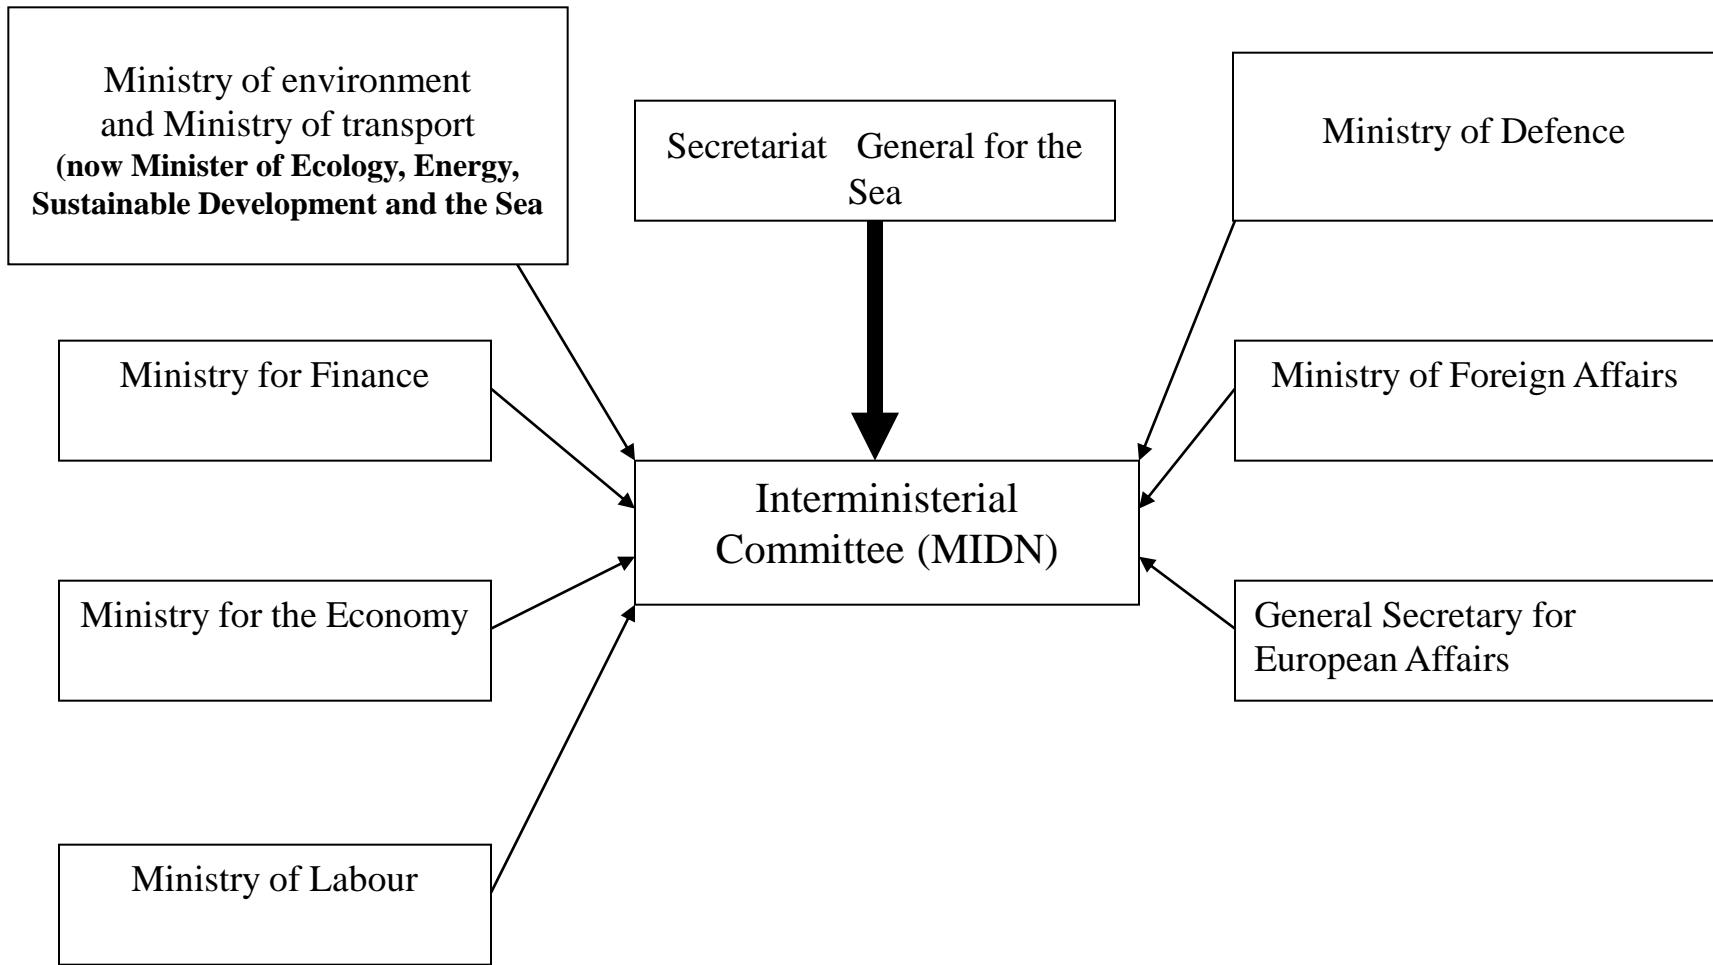

# I / Development of the HK convention and France's maritime policy

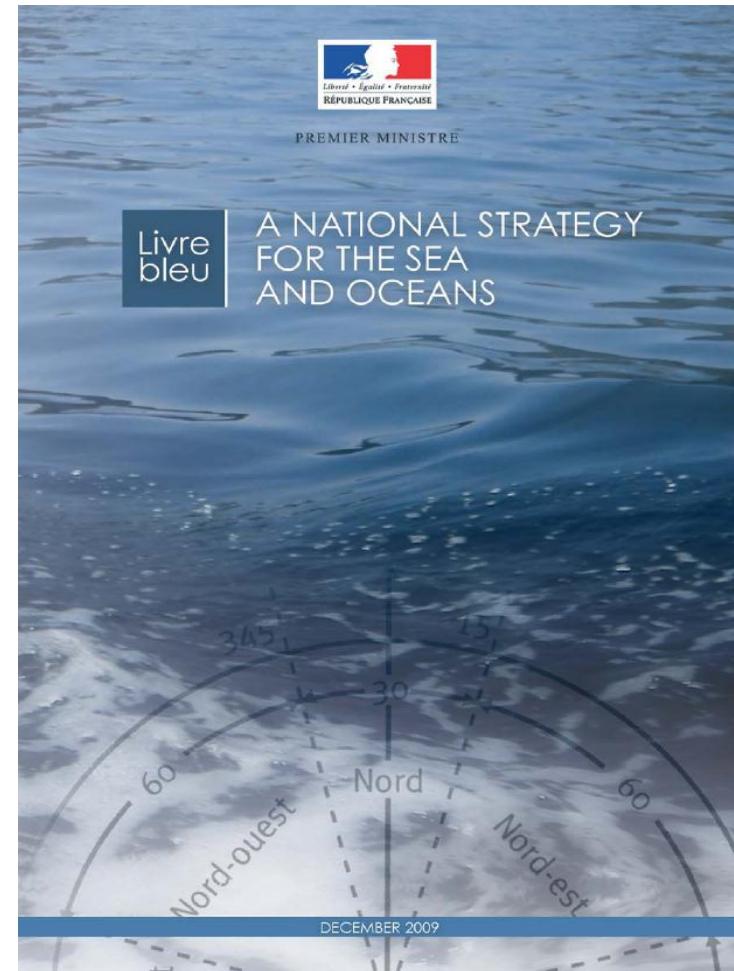

- **2005** : 24th Session of IMO Assembly adopted Resolution A.981(24) and agreed to request: "**the Marine Environment Protection Committee to develop a new legally-binding instrument on ship recycling....**"
- **2005 / 2006** : Q 790 (ex Clemenceau)
- **2006 – 2007** : **Interministeriel Ship Committee on ship recycling**
- **2007 – 20XX** : **Secretariat General for the sea (Prime Minister offices) Interministeriel Coordination on ship recycling**
- **2008** : « An EU strategy for better ship dismantling » adopted by the Commission
- **2009 (May)**: **Hong Kong convention (Diplomatic Conference)**
- **2009 (July)** : **Oceans Round Table (preliminary consultation process)**
- **2009** : EU Council conclusions
- **2009 (December )** : **France's maritime policy “Blue Book : a national strategy for the sea and oceans ”**

## I/ Committee on the dismantling of Civilian and Military End of Life Ships (2006 – 2007)

# I/ Policy and Approach in France

Secrétariat Général de la Mer

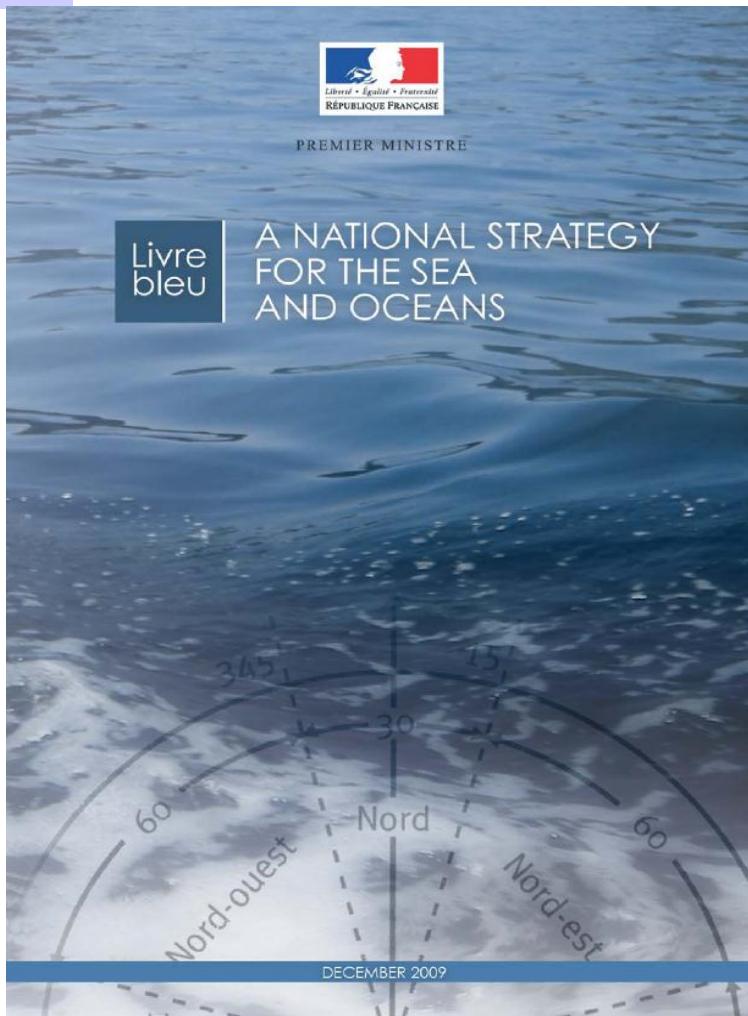

MURORAN 2010

# I/ Oceans Round Table preliminary consultation process

- **9. Encourage / organise the creation of a French ship breaking, recycling and depolluting industry**, favouring a local approach and encouraging shipyards to operate according to the principles of sustainable development (including overseas) and retiring the ships that are the least safe and most harmful to the environment. This industry could be steered by a public interest group. Particular use should be made of existing experience and skills. A sponsor will soon be appointed and work will begin on establishing this industry.
  - A french MP has been nominated in december (work still in progress)

## II A national strategy for the sea and oceans

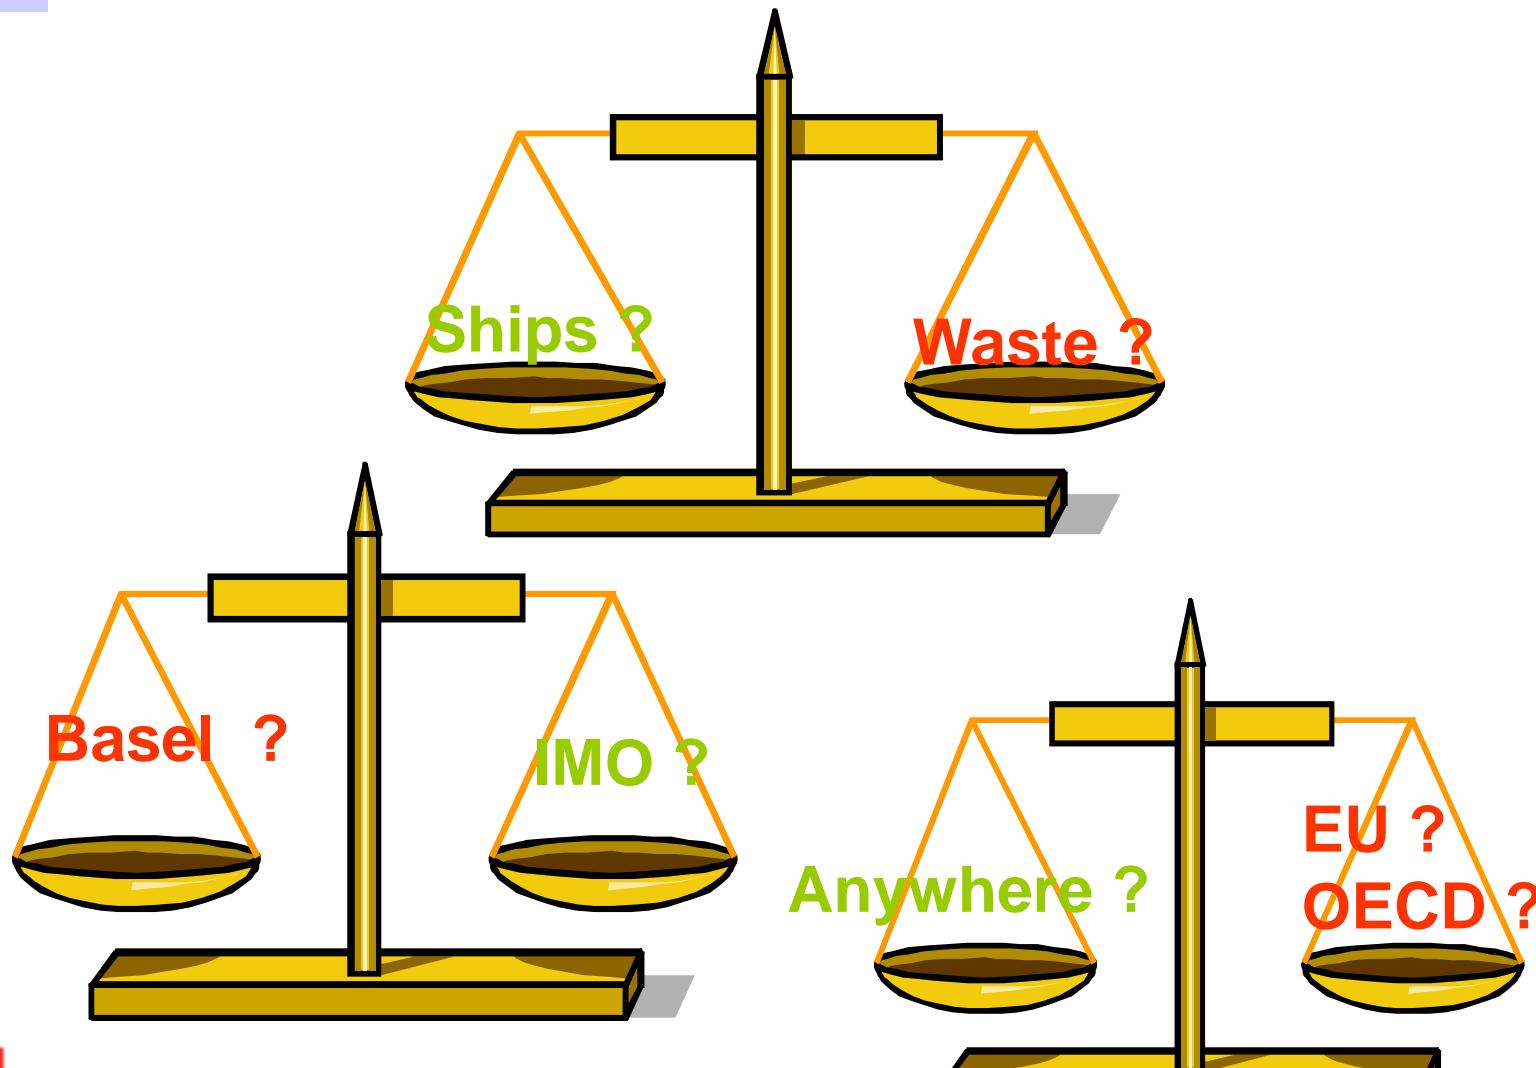

- On July 2009, the President of the Republic asked for a “Blue Book” on France’s maritime policy. The document has been adopted in december 2009
- This Blue Book presents a strategic vision of the maritime policy France intends to implement and defines its major lines
- It will serve to define action in the maritime sector, whether international, European Union or at national or local level

## I/ France's strategy on ship recycling (1/3)

- France intends to **ratify the Hong Kong Convention as soon as possible** (objective 2010) and will work actively at international level to advance its entry into force.
- At the same time, this country will support an EU approach to apply its provisions in advance in agreements with third countries, thus exemplifying the important role Europe will play in supporting the upgrading of these countries' shipyards.

# I/ Relationship between HK Convention , Basel convention and EU legislation

## I/ France's strategy on ship recycling (2/3)

- Further studies will be made to develop national or joint European solutions for dismantling certain types of vessel taking into consideration **economic viability** and the **existing industrial structure**, within a perspective of sustainable development.

# I/ France's strategy on ship recycling (3/3)

- This applies to low-tonnage vessels (particularly fishing boats and yachts), for which some contractors have already established a position.
- The aim will be not to subsidise a sector but to ensure that initiatives by small firms or large industrial groups are supported and encouraged.

# Policy and Approach in France

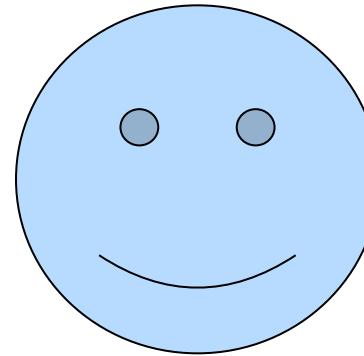

- I/ France's maritime policy
- II/ France's stakeholders
- III/ French experiences
  - Low-tonnage vessels
  - Military ship
- IV/ The way forward
- III/ Conclusion

## II / Stakeholders

### Hong Kong Convention

**Ships  
certified**

**Recycling  
facilities  
authorized**

Administration (Flag State)  
And  
Shipowner

Competent authority (SR State)  
And  
Recycling Company

## II/ Early implementation of the HK Convention (who are the stakeholders ?)

- HK Convention
  - Flag States
  - Recycling States
  - Shipbuilders,
  - Ship recycling industries
  - Shipowners, (Cashbuyers )

- French stakeholders
  - Flag State
  - Recycling State ?
  - Shipbuilders
  - Ship recycling industries
  - Shipowners

## II/ French Ship owners /ship builders

- French Ship owners

- Generally buy new ships and sell them when they are still relatively young (average 7,4 years old)
- Mainly concern by Inventory of Hazardous Materials (new and existing ship)
- Are anxious to preserve their competitiveness

- French ship builders

- Involve with IHM

## II/ Abandoned ships: Stakeholders ?

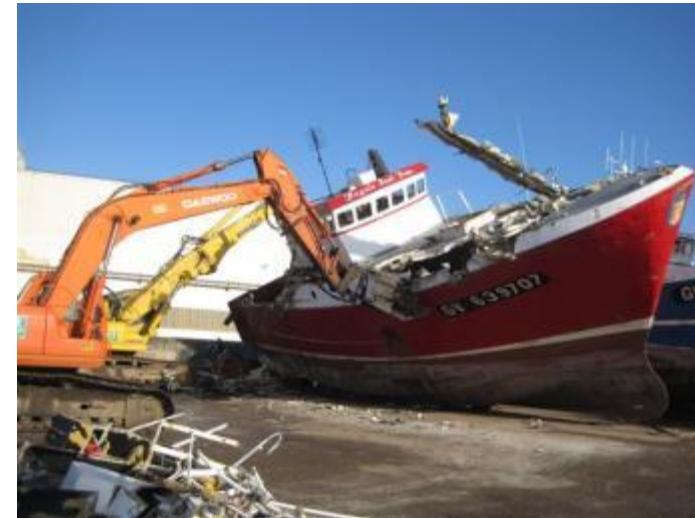

- France is confronted with the confiscation of ships breaching the law or/and with the abandonment by sub standards owners of trading vessels in its ports
- Capacities to turn against these owners are very low, including by way of national or international justice.
- Under these conditions, for the national authorities, the only means of separating from these ships in very bad condition is to deal with their dismantling financially and technically.

## II/ French ship recycling facilities (Once upon a time in France (1978))

## II/ French ship recycling facilities

- Mainly for low-tonnage vessels (particularly fishing boats and yachts ).

- A specific site dedicated for military ships is still to be decided.

# Policy and Approach in France

- I/ France's maritime policy
- II/ France's stakeholders
- III/ French experiences
  - Low-tonnage vessels
  - Military ship
- IV/ The way forward

### III/ French Ship Recycling facilities

#### *Site de Bassens*

# III/ French Ship Recycling facilities

## *Site de La Turballe*

# III/ French Ship Recycling facilities

*Site du Havre*

### III/ « Beaching » Lucifer (Cherbourg)

### III/ « Beaching » Lucifer (Cherbourg)

### III/ « Beaching » Lucifer (Cherbourg)

### III/ French ship , EU facility

# III/ Military Ships : Where are we today ?

- **New construction**

- Issue and maintain Inventory of Hazardous Materials

- **Existing Ship**

- Issue Inventory of Hazardous Materials

- **Withdraw from operational service**

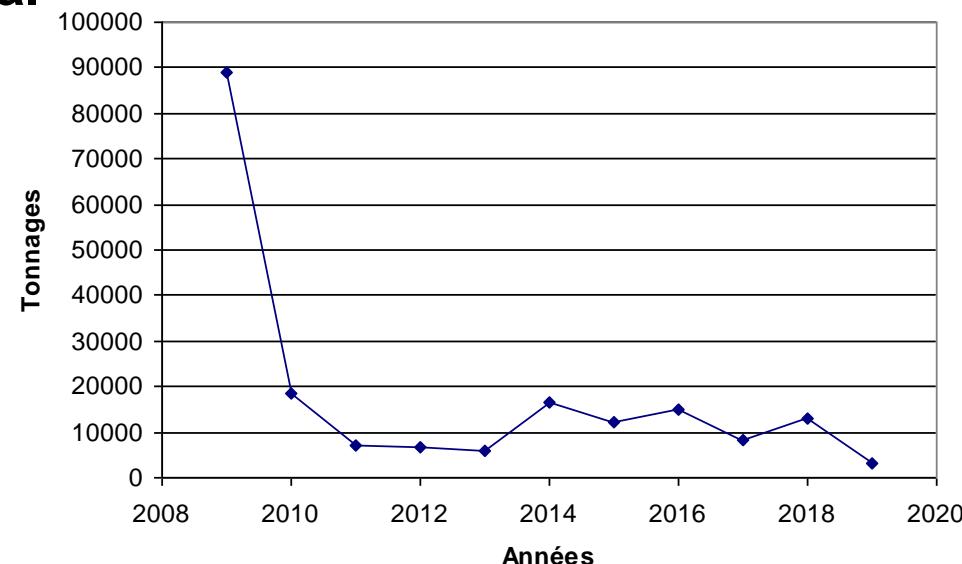

- Strip ship
- Breakwater; museum

- **Vessel disposal programme**

- **High priority ship**

- **Award contracts (Inventory)**

**Open competition  
BUT  
EU regulation**

# Policy and Approach in France

- I/ France's maritime policy
- II/ France's stakeholders
- III/ French experiences
  - Low-tonnage vessels
  - Military ship
- IV/ The way forward

## IV/ The way forward : IHM for new ship - French experiences

- Use the inventory as a prevention tool for crew, maintenance staff and workers
- Use the IHM as a central information tool (adding new columns reflecting the expectations of relevant legislation (hazard symbols, links to MSDS.....)

Secrétariat Général de la Mer

MINISTÈRE DE LA DÉFENSE

MURORAN 2010

## IV/ The way forward : IHM for new ship - French experiences

- Enlarge the list of HAZMAT to other substances that could be subject to restrictions or bans in future (anticipation of the EU regulations – REACH – by using the Material Safety Data Sheet as a standard of information)

## IV/ Horizon frigate

- **Horizon** : AA frigate 7000 t
- IHM has been asked at the end of the construction phase (but before operational phase)
- Difficulty to get all the relevant information

## IV/ IHM for Horizon frigate : an overview

# IV/ IHM Part I for Horizon frigate : Paintings

## INVENTAIRE DE SUBSTANCES DANGEREUSES / INVENTORY OF HAZARDOUS MATERIALS

### Localisation des gammes de peintures

### Location of paint range

- a) selectionner d'abord le **local**, puis la **surface** sur laquelle vous devez intervenir (le plafond, la cloison ou le pont),
- b) Noter la **gamme de référence** la peinture (D7, C4, E1) de cette surface, et vérifier sa **composition** dans le tableau "Ranges of Paints" situé à droite du premier tableau
- c) Vérifier les **contenus** de chaque peinture en faisant un tri dans l'onglet "IHM Part I" - colonne C
- d) Consulter la **MSDS** (Material Safety Data Sheet) de chaque peinture pour l'évaluation des risques ;
- e) Adapter vos **mesures de prévention** avant de commencer tout travaux.

- a) Select first the **room**, then the **surface** on which you have to intervene (the ceiling, the bulkhead or the deck),
- b) Note the **reference range** of the painting (D7, C4, E1) of this surface, and verify its **composition** in the table "Ranges of Paints" situated on the right of the first table (column C)
- c) Verify the **contents** of every painting by making a sorting in the sheet "IHM Part I" - column C,
- d) Consult the **MSDS** (Material Safety Data Sheet) of every painting for the evaluation of the risks,
- e) Adapt your **measures of prevention** before beginning any work.

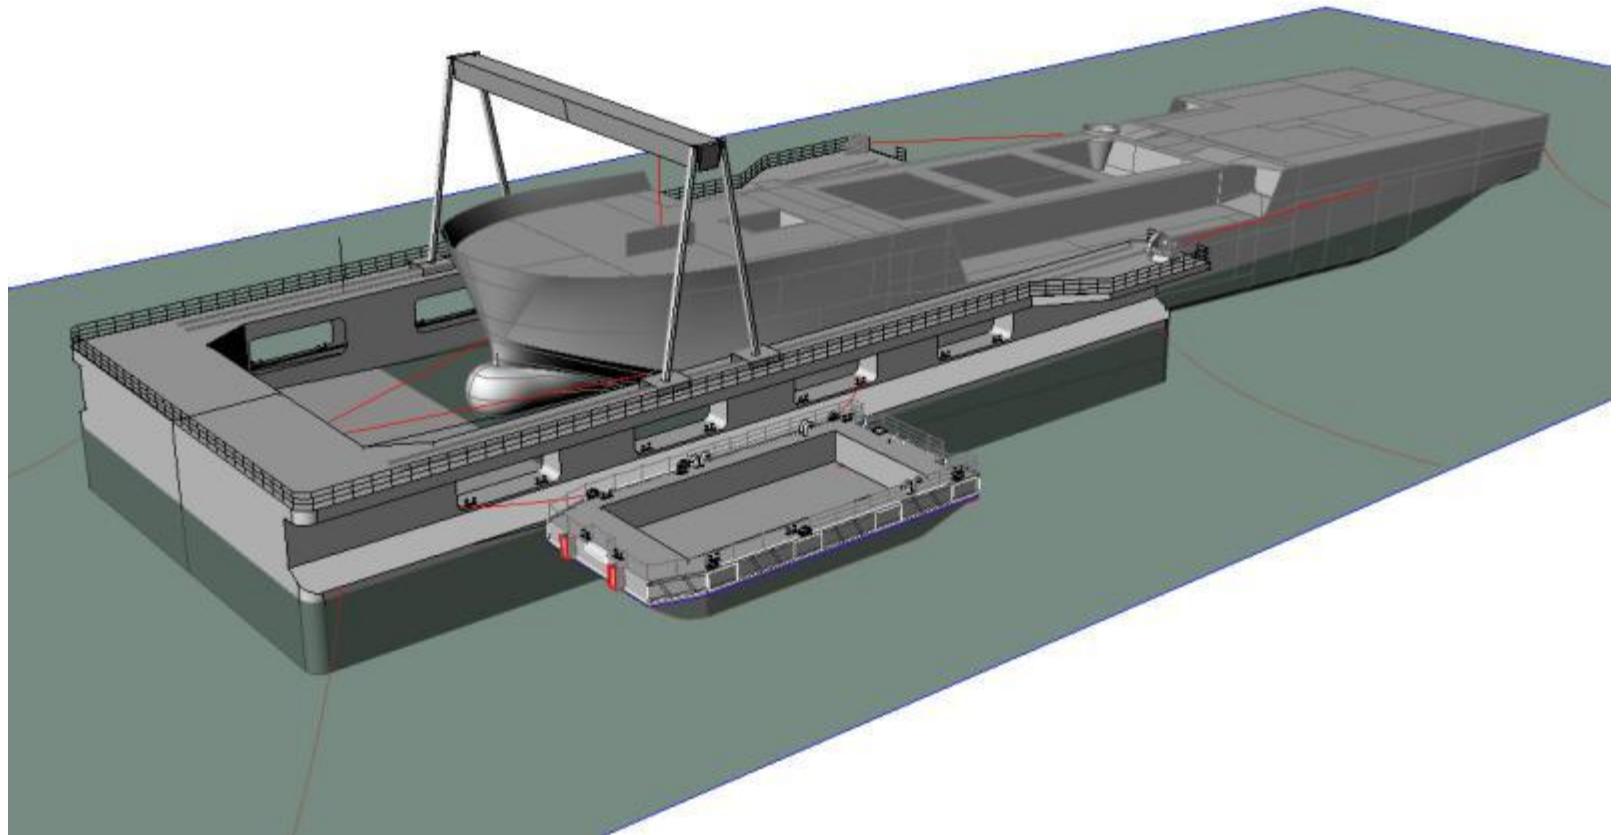

A tab dedicated to maintenance has been added.
